

In the Claims

Please cancel Claims 14-19. Claims remaining in the application are as follows:

1. (Previously Amended): A method for operating a server to provide content in association with image data, comprising:
  - communicating data via a communications network;
  - receiving image data and associated position data from a client connected to the network;
  - retrieving content data related to said position data from a database coupled to the server; and
  - producing an annotated image including said image data and said content data.
2. (Original): The method of claim 1, wherein said retrieving comprises:
  - identifying a location name corresponding to said position data;
  - querying at least one content database with said location name; and
  - receiving content data from said content database in response to said querying.
3. (Original): The method of claim 2, wherein said identifying a location name comprises:
  - querying a location database with said position data; and
  - receiving a location name from said location database in response to said querying.
4. (Previously Amended): The method of claim 2, wherein said content database comprises text.
5. (Original): The method of claim 1, further comprising:
  - receiving chronological data in association with said image data;
  - querying at least one content database with said chronological data; and
  - receiving content data from said content database in response to said querying;wherein said annotated image includes data obtained from said content database in response to said query based on said chronological data.

6. (Previously Amended): The method of claim 5, further comprising serving said annotated image to a client.

7. (Original): The method of claim 5, wherein said serving comprises serving a web page to said client, said web page including said annotated image.

8. (Original): The method of claim 1, wherein said position data comprises longitude and latitude coordinates.

9. (Original): The method of claim 1, further comprising storing said annotated image.

10. (Original): The method of claim 9, further comprising granting conditional access to said stored annotated image.

11. (Original): The method of claim 1, further comprising printing said annotated image.

12. (Previously Amended): A method for operating a server to provide content in association with image data, comprising:

- communicating data via a communications network;
- receiving image data and associated position data from a client connected to the network;
- querying a location database coupled to the server with said position data; and
- receiving a location name from said location database in response to said querying.

13. (Original): A system adapted to generate content in association with image data, comprising:

- a location database;
- a content database; and
- a server connected to said location database and to said content database, said server adapted to receive image data and associated position data from a client,

retrieve content data from a content database, said content data related to said position data,  
produce an annotated image including said image data and said content data,  
and  
serve said annotated image to said client.

19. (Canceled)

20. (Previously added) The method according to Claim 12 further comprising:  
querying at least one content database with said location name;  
receiving content data from said content database in response to said querying;  
producing an annotated image including said image data and said content data;  
serving a web page to said client, said web page including said annotated image; and  
storing said annotated image.
